

USAID GH/HIDN CHILD SURVIVAL AND HEALTH GRANTS PROGRAM

FY 2004 RFA CONFERENCE

September 8, 2003 Silver Spring, MD

United States Agency for International Development

Bureau for Global Health
Presentation: FY 2004 CSHGP RFA Conference
Richard Greene, Director
Office of Health, Infectious Diseases and Nutrition
September 8, 2003

Office of Health, Infectious Diseases and Nutrition Strategic Objectives

- SO2 Increased use of key maternal health and nutrition interventions
- SO3 Increased use of key child health and nutrition interventions
- SO5 Increased use of effective interventions to reduce the threat of infectious diseases of major public health importance

HIDN Key Programmatic Strategies

- Scaling up proven, high impact interventions to achieve country level impact
- Establishing proof of principle and/or introducing new interventions that have the potential for country-level impact

Ladder of Progress

- Potential high impact interventions identified
- Potential interventions tested (safe, effective, feasible)
- Interventions introduced in demonstration areas with good coverage at reasonable cost

Ladder of Progress Con't

- Intervention combined with others to achieve impact in one of the SO areas-
Comprehensive programs leading to country-level impact
- Implementation of intervention in multi-countries leading to region wide or multi-country impact

Key PVO Trends to Accelerate

- Serving large beneficiary populations
- Focusing on fewer interventions
- More national level impact (policy, advocacy)
- Greater role in global alliances
- Better fit with Mission PHN strategies

By accelerating these trends, PVOs will better contribute to national level impact

Child Survival Revitalization

- CS funding, trends stagnating
- AIDS and global initiatives taking center stage
- Partners now taking action: Lancet series, Ottawa meeting, CS WG, CS scorecard, country level implementation
- PVOs will play a key role
